

**PROPOSED TITLE: PROBLEMS OF DIOPHANTINE EQUATIONS WITH APPLICATIONS**

**PROPOSED JOURNAL: JOURNAL OF ADVANCED RESEARCH IN APPLIED MATHEMATICS AND STATISTICS**

**NUMBER OF PAPERS: 7 TO 12**

**A BRIEF EDITORIAL STATEMENT FOR THE SPECIAL ISSUE:**

Diophantine equations have wide applications in the various disciplines of science and engineering to determining the solutions of the problems of balancing the chemical reactions, word problems of real life, puzzles, and problems of astrology. Modular arithmetic method, the decomposition method, mathematical induction method, Fermat's infinite descent method, Catalan's conjecture method, and parametric method are the frequently used methods to solve these equations. This special issue will focus on the problems of Diophantine equations with applications.

**AIMS AND SCOPE (TOPICS):**

- Linear Diophantine Equations
- Quadratic Diophantine Equations
- Exponential Diophantine Equations
- Polynomial Diophantine Equations
- Non-linear Diophantine Equations
- The Mordell Equation
- The Fermat Equation
- The Catalan Equation
- The Pell Equation
- The Thue Equation
- Topics Related to any other Development in Diophantine Equations

**TIMELINE:**

SUBMISSION DEADLINE	60 DAYS
REVIEW RESULTS	20 DAYS
DEADLINE FOR REVISIONS	10 DAYS
NOTIFICATION OF FINAL DECISION	WITHIN 5 DAYS OF REVISION
APPROXIMATE PUBLICATION DATE	WITHIN 4 MONTHS

**EDITORIAL TEAM:**

**LEAD GUEST EDITOR**

Dr. Sudhanshu Aggarwal  
Assistant Professor  
Department of Mathematics  
National Post Graduate College Barhalganj Gorakhpur Uttar Pradesh India
